## ANNUAL REPORT 1957-1961

U. S. DEPARTMENT OF AGRICULTURE  
AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

#### Top Picture

The harvest scene on a family farm in Whitman County near Lacrosse, Washington, typifies the harvesting of the approximate 100,000,000 bushel wheat and other grain crops produced annually in the State of Washington. Price Support Programs on grain, and other Commodity Programs, administered by ASCS are a vital part of our Government's determination to put America's farm abundance to good use to help insure the strength and welfare of future generations.

#### Center Picture

The livestock pond and improved range seeding of Bromegrass-Intermediate Wheatgrass mixture is a scene on the Robert Perry range in Asotin County. This combination of conservation measures also provides food and habitat beneficial to wildlife. This is a typical example of the broadening conservation concept of conserving, improving and using our natural resources. Cost of establishing these practices were shared by the Federal Government under the Agricultural Conservation Program. Technical assistance was provided by the Soil Conservation Service, Extension Service, and State Department of Game and Fish.

#### Bottom Picture

This is a scene of a sugar beet harvester in Yakima County. This modern machine with one or two men can harvest about 100 tons of sugar beets a day. Approximately 55,000 acres of sugar beets were harvested in the State of Washington in 1961 with an average yield of  $23\frac{1}{2}$  tons per planted acre.

## F O R E W O R D

The important conservation and economic accomplishments outlined in this report have been realized thru the unlimited cooperation and assistance given us by the thirty-nine county ASC committees and the three hundred and nine community committees in the State of Washington. Their assistance is gratefully acknowledged.

The program recorded herein are those programs of the United States Department of Agriculture which are administered in the State of Washington by the ASC State Committee. To provide this information in handy reference form, this report is compiled giving current, overall land use information and also program information for the latest five-year period for comparison purposes.

We believe a comprehensive summary of background statistics is vitally important in the operation of current, as well as the planning for future agricultural programs. Factual knowledge of "Where We Have Been" is a necessity in the proper planning for "Where We Are Going."

### WASHINGTON ASC STATE COMMITTEE

Participants receiving exactly \$2,500.00	No.	17							
Participants receiving \$2,500.01 and over through participation pooling agreements	No.	12							
Cost-share to participants receiving \$2,500.01 and over	\$ 36,056								
<b>TOTAL</b>							75,136	63	343
								19	

Does not include any acreage for which assistance for these materials was given under another practice.

September 21, 1962

Number of farms exceeds number of units because of pooling agreements.

All data except the amount of assistance may be duplicated in C-12P.

The extent represents all of the acreage irrigated on farms performing the practice.

Charges in excess of the basic State allocation due to advance of funds from the 1962 program as authorized by the 1962 Appropriation Act.
